Please see following mail string. I asked Chris Saari whether he knows of any plans by REI for next steps at the site and also let him know what I am thinking about funding. He doesn't seem to know any more than we do. He expects that they will develop a plan after we meet on 5/26.

No, I think anything that you could fund would help further the project along. In addition to the obvious information that it would provide, it might make the Kozaks more comfortable to know that they don't have to do everything here on their own.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Thanks, Chris.

I don't know exactly what I can fund if we move ahead with field work, but am considering having some MIP/HPT work done, or something similar that will provide plume geometry information, and also placing 2 additional wells to support the tribe's plans for summer lake-bed sampling.

Do you have any objections or see any downside to us planning to move forward with this, assuming I can fund all of it in the near future? I know it's difficult to predict what will be decided at our meeting, but I value your input into my preliminary plans.

Thank you.

I think Dave Larsen's plan is to see what we want/need and then write up a work plan accordingly.

We are committed to service excellence.

Hi Chris,

Do you know if REI will be submitting a work plan for the Tower Standard site before our meeting on 5/26, or do you think they will be waiting until we talk before making plans to move forward?

I am putting together an SOW for my contractor and considering what I'd like to have done and what I have funds to do.

Thanks.
